AMENDMENTS TO THE SPECIFICATION

Please amend the Specification at page 12, line 9 and at page 14, lines 4-6. Enclosed herewith are copies of those pages in which those sections have been marked up to show the changes made relative to the immediately prior version, which was the version of the application as originally filed. These pages are submitted in accordance with the revised Format of Amendments signed January 31, 2003. Since these amendments to the Specification are not extensive, it is not believed that a clean version of the revised pages is not required.
